EVERY  
SINGLE DROP  
CAN MAKE  
A DIFFERENCE!

Taking action  
to save the planet.

The first step  
towards a  
plastic-free world.

Can you imagine what our world would be like if, in a couple of years, our seas were filled with plastic instead of fish? This chilling thought could become reality if we don't do something now. Every year, Italy alone dumps **more than 132,000 tons of PET bottles** into the sea. Using a reusable water bottle as an alternative to plastic is something we can all do to help save the planet. Here are some tips to make sure we use it properly.

Don't just  
protect the planet,  
protect yourself  
too.

If you use a reusable water bottle every day, **it should be rinsed with warm water after use.** It's important for our health to wash the bottle and the cap daily. And, to keep it extra clean, **it should be washed thoroughly every month.** Just fill the water bottle with 1/2 soapy water and 1/2 vinegar, leave it overnight then rinse it out the next day. Your bottle should be washed regularly to keep it clean and hygienic.

Can I wash  
it in the  
dishwasher?

The reusable water bottle is dishwasher safe but **it might wear out quicker** and may not be properly sanitised. We therefore suggest you wash it by hand.

Thanks for your  
commitment  
to the environment!  
Use the water bottle  
and keep it nice  
and clean:  
you'll be doing your  
planet and your health  
a favour.

CAMPAIGN TO RAISE AWARENESS  
ABOUT THE ENVIRONMENT  
AND USERS' HEALTH.

Only remove the cap when  
you are filling the water bottle.  
Avoid drinking from the bottle  
without the cap as it may have  
rough edges.

DISHWASHER  
MAX 60°C

FREEZER  
NO!

**WATER BOTTLE**  
600 ml (48 g)  
Bottle in PETG  
Cap in PP  
**This is not a toy.**

**BAG**  
Microfibre (polyester)  
bag for holding glasses  
and cleaning lenses.
